Gorontalo, Indonesia

An IT enthusiast. I thrive in the field of Web and Android Development. Proficient in Git and Github collaboration. My skills include intermediate proficiency in Typescript, React, Vue and Tailwind for Web Frontend, Laravel and NextJS for Web Fullstack, and Jetpack Compose for Android. Eager to learn new things in this field.

Work Experiences

Universitas Negeri Gorontalo - Gorontalo, Indonesia   May 2024 -

Frontend Web Developer

WebGIS Destana (Gistana) is a WebGIS that provides data on evacuation routes and gathering points in several villages in Bulawa sub-distict, Bone Bolango Regency, Gorontalo, Indonesia

- Led the development of a WebGIS project to map disaster-prone areas and evacuation routes.
- Collaborated with the UI/UX team to develop an engaging and user-friendly interface.
- Utilized technologies such as Leaflet.js, Lottie, Vue.js, TailwindCSS, and ShadcnUI to create interactive visuals.

Universitas Negeri Gorontalo - Gorontalo, Indonesia   May 2024 -

Frontend Web Developer and Project Manager

KabGGIS is a WebGIS that provides geospatial agricultural area information in Gorontalo Regency, Gorontalo, Indonesia

- Leading the development of the WebGIS agricultural area mapping project for Gorontalo Regency.
- Utilized technologies such as Leaflet.js, Vite, React.js, and TailwindCSS to build interactive visuals.

Bangkit   Dec 2023 -

Android Developer

Bangkit is a career readiness program designed by Google to give Indonesian students direct exposure to industry practitioners, as well as prepare students with relevant skills for successful careers at leading technology companies.

- Led the development of the Android application from Ingridentify (AI powered Recipe App) and successfully completed the deliverables within a month.
- Slicing the User Interface from Figma into a ready-to-use application.
- Integrate the application with backend APIs and display AI image classification results to the application.

Kelompok Studi Linux - Gorontalo, Indonesia   Oct 2023 - Nov 2023

Backend Developer and Project Manager

Kelompok Studi Linux is a place for students to develop their talents to become students who excel in academic and non-academic fields.

- Led and directed the development of the KSL new member registration website and successfully completed all deliverables within two months.
- Using Laravel as a backend framework and utilizing Laravel features such as Middleware, Guard, Policy, etc.
- Using Laravel mix to compile TailwindCSS which is used on the Frontend as a CSS Framework.

Education Level

Universitas Negeri Gorontalo - Gorontalo, Indonesia   Aug 2021 - Jun 2025 (Expected)

Undergraduate Informatics Engineering, 3.76/4.00

SMKN 1 Boalemo - Gorontalo, Indonesia   Aug 2018 - Jun 2021

Computer & Network Engineering
